

ADVANTAGES OF USING BLADDERS

- Quality controlled, tested to twice the pressure exerted by water, by using air.
- Zero sun penetration – completely black inner surface.
- Zero algae growth.
- Zero change in water temperature – water sits against the top surface whether the unit is a quarter or three quarters empty.
- **Zero evaporation.**
- UV stabilized reinforced PVC with a patented corner design – designed, patented and manufactured by Professor Bredenkamp (electrical engineering), manufactured in SA since 2007.
- Easy to transport – a 200000L unit weighs 220kgs and can be thrown into the back of a car.
- Will last anything between 10-15 years (warranty is 5 years).
- Can be branded (not digitally, one or two spot colours only).
- Can be supplied with fittings suitable for the correct connections to tanker trucks (Cam Lock fittings for example)
- Price per litre on size is not comparable to any other storage units – it is by far the cheapest method.
- Can be used for most fluids – water, fertilizer, diesel, transformer oil, cane juice, wine etc....PH charts for compatibility available on request.
- Can be custom made to sizes required.
